ABOUT ME

A reliable and driven software design engineer with six years of experience delivering high-quality solutions in both Waterfall and Agile Scrum environments. Skilled in the full development lifecycle — from gathering requirements to deployment — I've built a reputation for strong client relationships and delivering quality results. I take pride in producing work that blends precision with innovation. I am now seeking to bring this commitment and creativity to a forward-thinking organization that values excellence, collaboration, and continuous growth.

WORK EXPERIENCE

- WeServ Systems International, Inc.** 2021-2025
Application System Engineer/Consultant
 - Estimated effort requirements for design, source code, and testing.
 - Modified existing source codes according to client's requirements.
 - Handled non-routine tasks for existing software, including code reviews, feature research, and implementing improvements.
 - Updates and maintains software according to specifications and documentation.
 - Engaged in independent study on vue.js and TypeScript in preparation for an upcoming project with hands-on output.
- NEC Telecom Software Philippines, Inc.** 2019-2021
Software Design Engineer 1 & 2
 - Hands-on experience across all phases of software development.
 - Estimated effort requirements for design, source code, and testing.
 - Created and developed detailed designs based on requirements analysis.
 - Created and performed unit and integration tests.
 - Performed peer-review for design documents, source codes, and test specifications.
 - Utilized various development and testing tools such as VSCode, Eclipse, Ranorex, JUnit.
 - Experienced working in both Agile and Waterfall methodologies.
 - Spent time in Japan working closely with the client to clarify questions and make sure we were aligned on the project's goals and requirements.
- Ancile, Inc.** 2018
Web Developer
 - Developed and maintained websites for clients according to their needs and desired design using HubSpot CMS.
 - Created PSD files for website design proposals.
